

Sub-task

- [SLIDER-45] - Add ability for the agent to find the AppMaster location upon restart
- [SLIDER-90] - Slider to work on HA NNs
- [SLIDER-145] - create slider 0.40 release
- [SLIDER-196] - Agent to work on Windows
- [SLIDER-241] - Convert funtests to integration tests
- [SLIDER-268] - Post discovery add ability for agents to register to AM and start heartbeat
- [SLIDER-314] - factor out internal keys into class InternalKeys
- [SLIDER-320] - AppState RoleInstances to store endpoint details

Bug

- [SLIDER-34] - Restarted AM cannot create containers
- [SLIDER-245] - Add sample app for jmemcached
- [SLIDER-247] - Slider should not complain when Service does not have any config files
- [SLIDER-250] - Slider AppMaster does not start on Windows
- [SLIDER-256] - Use package information from metainfo.xml
- [SLIDER-266] - HADOOP_USER_NAME should not be passed to slider launcher in when security is enabled
- [SLIDER-269] - Build failure in the develop branch
- [SLIDER-270] - Calling flex (down) the second time does not work
- [SLIDER-271] - When a container is releases the AppMaster should not monitor heartbeats from that container
- [SLIDER-272] - Application should specify the config types to publish
- [SLIDER-273] - Add ability to specify a port as shared across component instances or not
- [SLIDER-275] - app packages should get loaded to user directories
- [SLIDER-276] - AgentProvider releases nodes that the AM has already been released after detecting heartbeat failure
- [SLIDER-292] - AppMaster should re-export all export groups when restarted
- [SLIDER-293] - On Windows slider agent should be able to execute commands and not wait for completion
- [SLIDER-294] - Clean up memcached app packages for Windows and Linux
- [SLIDER-298] - Add an application package template
- [SLIDER-307] - command line --resopt options aren't being picked up
- [SLIDER-313] - Slider AM fails to restart on kill, post newly created application
- [SLIDER-325] - codahale metrics not being uploaded to AM classpath
- [SLIDER-331] - Check licenses and dependencies
- [SLIDER-332] - Add LICENSE file and license headers to kazoo scripts
- [SLIDER-370] - At times certificate generation fails due to existence of temp security dir

Improvement

- [SLIDER-219] - A service may ask for more than one dynamically allocated port as part of the same configuration
- [SLIDER-228] - Set up enforcer plugin to assert that JDK7 is used to build project
- [SLIDER-318] - rm slider-assembly module that isn't used

New Feature

- [SLIDER-3] - Design and implement service registry -for slider and beyond

Task

- [SLIDER-223] - Provide action to update Instance Definition

Edit/Copy Release Notes
